CHICAGO, ILL., U. S. A.

GENERAL OFFICE AND SALESROOMS

# Preface

**I**N compiling Catalog A, we have endeavored to accurately illustrate our complete lines of Sanitary Plumbing Fixtures and Modern House Heating Appliances. In addition to these will be found full and varied lines of the staple goods and specialties entering into the construction of present day Plumbing and Heating Systems.

We are, therefore, confident that it will be found advantageous to the Trade as a catalog of general reference and valuable to the architect or owner in making selections or writing specifications.

Customers will please refer to catalog and plate number in making orders or inquiries, thereby avoiding unnecessary correspondence and delays and assisting us to handle their business expeditiously.

We will endeavor at all times to serve our customers in such manner as to merit a continuance of their patronage and maintain our reputation for prompt service and fair dealing.

WEIL, BROS.

APRIL, 1910.

# Terms

Terms: Cash unless otherwise agreed upon. Prices subject to change without notice.

Contracts subject to strikes, accidents or other causes beyond our control.

No claims allowed unless made within ten days of date of invoice.

We guarantee our goods to the extent that we will replace those proved defective when used for the purpose manufactured, but no goods are taken back and credited, unless our consent has first been obtained.

No charges for labor or expense involved in the repair of defective goods or occasioned by them will be allowed. If goods are defective the measure of damages is the price of the defective goods only.

When goods are received in bad order notation to this effect must be made on carrier's receipt.

The Carriers are responsible for goods lost or damaged in transit.

Boxing and Cartage are charged at cost.

WEIL BROS.

APRIL, 1910.

## INDEX

## A

Adjustable Pipe Hangers.....	622
Air-Cell Covering.....	683
Air Cocks.....	662
Air Valves Radiator.....	651
Alaska Closet Combinations.....	180
Alcove Enameled Lavatories.....	83
Almeria Seat Baths.....	33
Altitude Gauges.....	591
Amazon Closet Combinations.....	163
Amherst Enameled Baths.....	17
Angle Valves, Brass.....	645
Valves, Iron Body.....	654
Anita Seat Baths.....	34

## WEIL'S PORCELAIN BATH TUBS

## THE "REGAL"

## A - 100

A-100 illustrates Weil's "Regal" Porcelain Bath Tub on Base, made to tile into Recess, Glazed White Inside over Roll Rim and along Base; fitted complete with Concealed Bell Supply Fixtures with Four Arm China Tipped Waste and Valve Handles with China Wall Plate and  $\frac{1}{2}$  inch Iron Pipe Size Seamless Supplies.

## DIMENSIONS

Width outside, 31 inches.                      Depth inside, 19 inches.  
Height, 21 inches.

## PRICES

	Length of Tub over Rim (Nominal) - - - -	5 ft.	5 ft. 6 in.	6 ft.
A-100	Class "A" complete as described .....	\$ 171.00	\$ 179.00	\$ 195.00
A-100	Class "B" complete as described .....	134.75	142.25	154.00

If with "Acme" White Exterior Finish, add \$15.00.

NOTE — The Outlet of this Tub is at the end through side wall.

## WEIL'S PORCELAIN BATH TUBS

## THE "SEVILLE"

## A - 101

A-101 illustrates Weil's "Seville" Porcelain Bath Tub on Base to tile into left hand corner, Glazed White Inside on Top over Roll Rim and around Base; fitted complete with Nickel Plated Compression Supply Fixtures, enclosed at end of Tub, with China Bell, China Knob Ideal Waste and China Indexed Valves with  $\frac{1}{2}$  inch Iron Pipe Size Seamless Supplies to floor.

## D I M E N S I O N S

Width outside, 30 inches.                      Depth inside, 18 inches.  
Height, 21 inches.

## P R I C E S

Length of Tub over Rim (Nominal)	- - - - -	5 ft. 6 in.
A-101 Class "A" complete as described.....		\$ 173.25
A-101 Class "B" complete as described.....		134.25

If with "Acme" White Exterior Finish, add \$ 15.00.

If with China Tipped Cross Handles on Valves, add \$ 1.00.

For other styles of Bath Tub Trimmings see pages 35 to 39.

NOTE — The "Seville" can also be furnished for right hand corner.

## WEIL'S PORCELAIN BATH TUBS

## THE "COLONIAL"

## A-102

A-102 illustrates Weil's "Colonial" Porcelain Bath Tub on Base to tile into right hand corner Glazed White Inside over Roll Rim and around Base; fitted complete with Nickel Plated Compression Bell Supply Fixtures with China Knob Ideal Waste, China Indexed Valves and  $\frac{1}{2}$ -inch Iron Pipe Size Seamless Supplies to floor.

## DIMENSIONS

Width outside, 30 inches.      Depth inside, 19 inches  
Height, 21 inches.

## PRICES

Length of Tub over Rim (Nominal)	5 ft.	5 ft. 6 in.	6 ft.
A-102 Class "A", complete as described	\$ 127.00	\$ 135.25	\$ 155.00
A-102 Class "B", complete as described	96.50	104.75	124.50

If with "Acme" White Exterior Finish, add \$ 15.00.

If with China Tipped Cross Handles on Valves, add \$ 1.00.

For other styles of Bath Tub Trimmings see pages 35 to 39.

NOTE — The "Colonial" can also be furnished for left hand corner.

## WEIL'S PORCELAIN BATH TUBS

## THE "WELLINGTON"

## A-103

A-103 illustrates Weil's "Wellington" Porcelain Bath Tub on Base, Back Rim to tile into wall, Glazed White Inside over Roll Rim and around Base; fitted complete with Nickel Plated Compression Bell Supply Fixtures with China Knob Ideal Waste and China Indexed Valves with  $\frac{1}{2}$  inch Iron Pipe Size Seamless Brass Supplies to floor.

## DIMENSIONS

Width outside, 30 inches.                      Depth inside, 19 inches.  
Height, 21 inches.

## PRICES

Length of Tub over Rim (Nominal)	-	-	-	-	-	5 ft.	5 ft. 6 in.
A-103 Class "A" complete as described.....						\$ 148.50	\$ 156.50
A-103 Class "B" complete as described.....						114.00	120.00

If with "Acme" White Exterior Finish, add \$15.00.

If with China Tipped Cross Handles on Valves, add \$1.00.

For other styles of Bath Tub Trimmings see pages 35 to 39.

## WEIL'S PORCELAIN BATH TUBS

## THE "SOMERSET"

## A - 104

A-104 illustrates Weil's "Somerset" Light Pattern Porcelain Bath Tub on Base, Glazed White Inside over Roll Rim and around Base; fitted complete with Nickel Plated Compression Bell Supply Fixtures with China Indexed Ideal Waste and China Indexed Valves with  $\frac{1}{2}$  inch Iron Pipe Size Seamless Supplies to floor.

## DIMENSIONS

Width outside, 30 inches.      Depth inside, 17 inches.  
Height, 21 inches.

## PRICES

Length of Tub over Rim (Nominal)	-	-	-	-	4 ft. 6 in.	4 ft. 10 in.	5 ft. 4 in.
A-104 Class "A" complete as described	.....				\$ 93.25	\$ 96.00	\$ 104.25
A-104 Class "B" complete as described	.....				79.00	83.00	89.00

If with "Acme" White Exterior Finish, add \$15.00.

If with China Knob Waste and China Tipped Cross Handles on Valves, add \$2.00.

For other styles of Bath Tub Trimmings see pages 35 to 39.

WEIL'S PORCELAIN BATH TUBS

THE "AVALON"

A - 105

A-105 illustrates Weil's "Avalon" Light Pattern Porcelain Bath Tub on Glazed Feet, Glazed White Inside and over Roll Rim; fitted complete with Nickel Plated Compression Bell Supply Fixtures with China Indexed Ideal Waste and China Indexed Valves with 1/2 inch Iron Pipe Size Seamless Supplies to floor.

DIMENSIONS

Width outside, 30 inches.                      Depth inside, 17 inches.  
Height on feet, 23 1/2 inches.

PRICES

Length of Tub over Rim (Nominal)		-	-	-	-	4 ft. 6 in.	4 ft. 10 in.	5 ft. 4 in.
A-105	Class "A" complete as described	.....				\$ 87.00	\$ 91.00	\$ 99.00

THE "ROYAL"

A - 658

THE "ROYAL"

A - 659

## A-658 THE "ROYAL"

A-658 illustrates Weil's "Royal" Closet Combination, comprising Vitreous China Siphon Jet Closet Bowl, A-781 Highly Polished Hardwood Semi-Saddle Seat without Cover, with Nickel Plated "Royal" Pressure Regulating Flushing Valve with China Universal Lever Handle.

A-658 Complete as described..... \$31.25

## A-659 THE "ROYAL"

A-659 illustrates Weil's "Royal" Closet Combination, comprising Vitreous China Siphon Jet Closet Bowl, A-781 Highly Polished Hardwood Semi-Saddle Seat without Cover, with Nickel Plated "Royal" Flushing Valve with Push Button Attachment through Wall.

A-659 Complete as described..... \$31.25

If A-781 Seat with Cover is wanted, add 50c.

If Floor Flange, with Gasket and Bolts is wanted, add \$1.25.

NOTE: A slight movement of the handle or push button of the "Royal" Valve operates the Valve and causes a complete Flush of the Closet, which may be repeated as soon as finished. The amount or duration of flush is not affected by retaining hold of the handle or push button, the same amount of water flowing at each flush. The valve will operate under any pressure from 1 to 100 lbs., requires no tank and is noiseless. The Supply Connection is one inch.

If with Galvanized Iron Frame and Bumper for same under each Seat, add for each \$1.25.

For Local Ventilating Attachments see page 201.

Length of Range may be determined by the number of Seats and their respective widths; for roughing in, add to length 22 inches, or 8 inches at inlet end for flush connection and 14 inches at outlet end for trap connection.

## WEIL'S AUTOMATIC SYPHON WASHOUT CLOSET RANGES

### VENTILATING CONNECTION FOR SYPHON WASHOUT RANGE CLOSETS

A - 903

#### VENTILATING SECTION

Ventilating Section for Single Range with Vent Pipe Collar (no Vent Pipe included). Add to price of Single Ranges, pages 199 and 200, for Painted Ranges \$5.00; for Enameled Ranges \$7.50.

Ventilating Sections with Vent Pipe Collars (no Vent Pipe included). Add to price of Double Ranges page 201; for Painted Double Ranges \$10.00; for Enameled Double Ranges \$15.00.

#### DESCRIPTION OF SYPHON WASHOUT CLOSET RANGE

"Weil's" Automatic Syphon Washout Water Closet Range is so arranged that a depth of 5 inches of water is at all times retained in the Range. The Tank operates automatically at desired intervals (by adjusting the supply valve in Tank). It has perforated Spray Pipes on front and rear and whenever the Tank discharges water is forced through them as well as the large Flush Pipe, thoroughly flushing all inside surfaces of the Range. The Tank is made of seasoned wood and is lined with heavy tinned and planished copper.

Air Pipe Connection with Tank and Upper Trap must be made as shown in illustration by dotted lines on pages 199, 200 and 201; (we do not furnish this pipe) and particular care should be taken that the Lower Trap, which we furnish, is in all cases put in place, otherwise syphonic action cannot take place.

For Roughing in: Sizes given above are for Ranges only—22 inches must be added to same for space required for the Outlet Trap and Flush Tank, being 8 inches at inlet end and 14 inches at outlet end.

Height from Floor to top of Seats 15 inches. When desired Legs can be furnished, raising Range 2 inches. Unless otherwise ordered Ranges will be sent with Outlets at Left Hand End as shown.

## WEIL'S INDIVIDUAL BOWL SYPHON CLOSET RANGES

A-904

## INDIVIDUAL BOWL RANGE CLOSET

A-904 illustrates "Weil's" Individual Flushing Rim Bowl Syphon Range with Cast Iron Flush Pipes, Oak Seats with Heavy Cast Brass Hinges, Tinned Copper Lined Pine Automatic Patent Flushing Tank, Upper and Lower Trap, as shown, and Brass Pipe with Union Couplings to connect Flushing Rims of Bowls.

## WEIL'S VENTILATED SLATE URINAL STALLS

SINGLE PATTERN TO SET  
AGAINST WALLDOUBLE PATTERN TO SET OUT IN  
ROOM AND AWAY FROM WALL

SECTIONAL VIEWS OF VENTILATED URINALS. A-1101 AND 1102, CROSS SECTIONAL VIEW, SHOWING DETAILS OF FLUSHING CISTERN, VENTILATING DUCT AND WASTE TROUGH

This is absolutely a sanitary fixture; the water for flushing the urinal is fed into slate cisterns through the pet cocks, which reduces the water consumed to the most economical degree.

The water overflows from the cisterns through the grooves at upper edge of back and forms a perfect and continuous sheet on the urinal backs and falls into the slate waste trough below. By using the standing overflow in the slate waste trough a body of water two inches deep is carried in it and so dilutes the urine as to keep the whole fixture free from odor.

The urinal is efficiently ventilated by having an air duct between the backs as shown in the double pattern and between the back and wall in the single pattern, and a draught can be created by placing a gas jet in the copper flue attached at the end, or the fixture can be placed on the fan system, or attached to a hot air flue or chimney. All odors are drawn up from the waste trough, then pass between the backs and out into the flue; thus ventilating not only the urinal, but the entire room in which it is located.

When a gas jet is placed in the copper flue, a very small flame only is required to create the necessary draught.

## WEIL'S MARBLE AND SLATE URINAL STALLS

A - 1103

A - 1103 illustrates "Weil's" Three Compartment Slate and Marble Urinal Stall, 1 inch Slate or  $\frac{3}{8}$  inch Marble Backs, Partitions and Ends,  $1\frac{1}{2}$  inch Countersunk Slate or Marble Base, Perforated Brass Washdown Pipe, Loose Key Stop, Galvanized Iron Gutter with Straight Outlet Connection, Brass Clamps and Bolts.

A-1300 illustrates "Weil's" Nickel Plated Brass Steam Water Heater for heating water for baths, lavatories, showers, etc., where steam is available, but no hot water system. The operation of this apparatus is very simple. The cold water supply is through  $\frac{3}{4}$  inch valve near top and  $\frac{3}{4}$  inch pipe on inside of  $1\frac{1}{4}$  inch outer casing, extending down to and connected with discharge to fixture as shown in A-1301. The steam supply is through  $\frac{1}{2}$  inch valve on top. The heater is provided with  $\frac{1}{4}$  inch steam drip connection at bottom.

When steam has been turned into the heater the supply to one of the fixtures should always be open.

A-1300 Price as described .....	\$25.00
A-1301 Heater same as above with Shower with Ball Joint and Cast Brass Head with 4 inch Removable Face.....	35.00

A - 1347 As described (without Faucets)...	\$50.75	\$56.25	\$59.75	\$63.25	\$84.25
If with Painted Legs, deduct \$2.10.					
If with A-1362 Waste Plugs with Couplings, add \$1.20.					

**WEIL'S WHITE GRANITINE LAUNDRY TRAYS**

TRAY AND HIGH BACK INTEGRAL

**A - 1350**

A - 1350 illustrates Weil's White Granitine Laundry Tray with 6 inch High Back Integral, Zinc Rim Capping and Zinc Wringer Guards, fitted with Overflow Waste Plugs with Collars and Painted Iron Legs.

**DIMENSIONS AND PRICES****TWO PART TRAY**

	Width 24 inches;		Depth 16 inches.	
	Length - - - - -		4 Ft. 4 Ft. 6 in. 5 Ft.	
A - 1350	As described (without Faucets).....	\$16.40	\$18.90	\$20.40

**THREE PART TRAY****DIMENSIONS AND PRICES**

	Width 24 inches;		Depth 16 inches.	
	Length - - - - -		6 Ft. 6 Ft. 8 in. 7 Ft. 6 in.	
A - 1351	As described above (without Faucets).....	\$27.10	\$30.10	\$34.10

If with Galvanized Legs, add for each Leg 70c.

If with Brass Rim Capping and Brass Wringer Guards, add

For Two Part Tray, 4 ft. \$4.00; 4 ft. 6 in. \$4.25; 5 ft. \$4.50.

For Three Part Tray, 6 ft. \$6.00; 6 ft. 8 in. \$6.25; 7 ft. 6 in. \$6.50.

We cannot too highly recommend the above line of Trays as very desirable for high class work. They present a handsome appearance being almost a pure white in color and finished a very smooth surface from which any stains may be readily washed off, thus retaining indefinitely their clean white color. The inside corners are rounded so as to avoid lodging places for dirt, lint, etc., making it a perfectly Sanitary Fixture.

## WEIL'S COMBINED KITCHEN BOILERS AND HEATERS

"PEERLESS"  
FULL VIEW

A-1387

"PEERLESS"  
SECTIONAL VIEW

A-1388

The "Peerless" Combined Gas Water Heater and Kitchen Boiler is the most perfect and satisfactory apparatus of its kind for supplying hot water for domestic purposes. In appearance, as a glance at illustration will suggest, it is similar to the ordinary Galvanized Kitchen Boiler except that the shell is extended at bottom of Boiler to enclose the Heater. The construction and operation of Heater are very simple. It is comprised of Burner, Disc or Spreader, Air Mixer and Pilot. The cold water pipe passes from boiler through burner to disc or spreader where water is quickly heated and circulation created through hot water pipe to fixtures.

The Pilot Burner when lighted will keep the water hot and circulation continuous at a merely nominal cost.

A-1397	Size No. 8.....	½ inch	2½	30	10¼	23.50

Note — No. 10 Heater has Nickel Plated Shower Attachment.

More Humphrey Heaters are used each year than all other kinds combined. Every Humphrey Instantaneous Bathroom Water Heater is made of copper, the valves of brass; all thoroughly nickel plated and highly polished; the large powerful burners are of cast iron and the shelf of enameled steel. They are practically indestructible, a necessity in every bathroom and an ornament in the finest.

Every Heater should be connected to a Vent Pipe.

## WEIL'S AUTO-THERMAL INSTANTANEOUS WATER HEATERS

## THE "HUMPHREY"

## A-1398

We consider the "Humphrey" the most simple, satisfactory, safe and economical Heater made. All working parts are of brass and copper. The heavy seamless copper coils are guaranteed to stand a working pressure of 300 pounds. The burners and jacket are of cast iron with an inner jacket of cast iron between which jackets is a dead space which prevents radiation of heat and thus maintains the efficiency of Heater at its highest point. The pilot light is extremely small and automatically controlled, the thermostat is external, positive and extremely sensitive and the gas and water control are perfect. When the outflowing water reaches 140 degrees the large burners shut off, saving gas, the hot water continuing to flow. When the hot water cools to below 130 degrees the large burners start up again until water again reaches 140 degrees. This is, we believe, the most economical Heater made. To convey an idea of the approximate cost of operating, it may be stated that with coal gas at \$1.00 per 1,000 cubic feet, 50 gallons of water at a fixed temperature of 118 degrees, drawn at once or a gallon at a time, may be obtained for a cost of five cents.

This heating capacity is based upon a normal water temperature of 50 degrees. Water at a higher temperature than that stated above may be obtained by reducing the flow of water through Heater.

WEIL'S CAST IRON WATER HEATERS  
FOR STORAGE TANKS

A-1400

The "Weil" Cast Iron Storage Tank Water Heater we consider the most perfect Heater on the market. It is manufactured for us exclusively, under our personal direction and embodies all the most desirable features of a first class Water Heater. It is very simple in construction comprising but three parts, viz., fire pot and water section in one casting, ash pit and smoke dome. The water section has top crown waterway cross connected, its interior surface is corrugated, thus increasing the direct heating or fire surface fully one-third more than that of the ordinary flat surface. It also provides for the admission of air around the outer edges of fire insuring perfect combustion and consequent economy of fuel.

The fire pot is of unusual depth, providing for a deep bed of coal as well as sufficient space between fuel and crown for combustion space. It has clinker door at grate line of ash pit.

The ash pit is of the one-piece type with a large ash door for the removal of ashes.

The grate is of the shaking and dumping pattern constructed for the burning of fine coal, either hard or soft, or of gas.

The smoke dome is provided with clean out door in front and check draft in rear.

## WEIL'S LAUNDRY HEATERS

## THE "WEIL"

A-1401

A glance at the above illustration will suggest a Heater that is of exceptionally well proportioned dimensions and properly made for service in the Laundry. The fire pot and water section are in one casting, with baffle plate which forces the fire to travel to an opening in front, then around the outside of baffle plate on both sides instead of a direct draft to chimney, as most heaters are made. This fire travel necessarily increases the efficiency of the Heater and greatly economizes the use of fuel.

It is provided with check damper and clinker door and swinging bar pouch feed door so that it can be fed while wash boiler is on top.

It will heat half a dozen irons, is arranged to take any standard size wash boiler, and will furnish 60 to 140 Gallons of Hot Water per hour. Burns hard or soft coal or gas.

WEIL'S GARBAGE CREMATORIES AND WATER HEATERS

WILK'S UPRIGHT TYPE

A-1407

The "Wilks" is made of heavy boiler plate and is carefully tested to 100 pounds cold water pressure. The Garbage Grates are made of the very best charcoal iron boiler tubing and are securely fastened to the inner shell. On the outer shell directly opposite the ends of tubes are plugs which may be removed and the tubes thoroughly cleaned of any sediment or scale which may accumulate. It has large fire box and garbage chamber and can be fed with either hard or soft coal.

## CRAGIN UPRIGHT TYPE

A-1408

The "Cragin" is one of the most satisfactory and popular Garbage Burners and Water Heaters on the market. It is constructed primarily as a Water Heater, but with careful attention to the construction, arrangement and location of coil great efficiency is attained as a Garbage Crematory, as well as a Heater and for an economical apparatus for the disposal of garbage and water heating, the "Cragin" is most desirable.

WEIL'S GARBAGE CREMATORIES AND WATER HEATERS

Cragin Horizontal Type

A - 1409

The "Cragin" Portable Horizontal Type of Garbage Crematory and Water Heater we consider the best apparatus of the kind manufactured. A glance at the illustration will suggest to the practical mind a general form of construction the very best possible to combine capacity, efficiency and convenience for service as an equipment for the disposal of garbage and for the supplying of hot water to storage tank.

It is made of  $\frac{1}{4}$  inch boiler plate 60,000 pounds tensile strength, with stay bolts and hand hole plates and riveted so as to stand a pressure of 125 pounds to the square inch. At the point where the coils pass through the rear head a solid plate is used leaving the coil room to expand and contract independent of the shell. The entire shell has a waterway of 2 inches, making the entire inner surface of heater direct fire surface. Its general efficiency cannot be overestimated and for hospital service where double sterilization of water is required this apparatus is invaluable as it will sterilize the water in both tanks at the same time.

## WEIL'S AUTOMATIC WATER SOFTENER AND SCALE REMOVING DEVICE

"DEHN" PATENT

A - 1417

Showing the Compound Injector ready for installation.

A - 1418

Showing the Compound Injector with Basket and Compound Brick removed from Interior of Feeder.

Dehn's Patent Automatic Water Softener and Scale Removing Device will positively overcome the accumulation of Lime, Magnesia and other Incrusting Minerals in Water Backs, Coils, or Heaters of any description or wherever these difficulties are experienced and *Hard Water* is used for general domestic purposes. It breaks *Hard Water* instantly, making it as soft as rain water.

A - 1419

Laundry Tank Heater connected to a Range Boiler, showing the Compound Injector connected in the Feed or Cold Water Pipe from the Range Boiler to the Heater.

It is simple and durable, nothing to get out of repair, anyone can operate it after being installed. The Compound Brick will dissolve in the water regardless of how cold or hot the water may be. For an ordinary residence you can regulate the two valves on Injector so that a Compound Brick will last for several weeks, hence you can obtain Soft Water and be relieved of an endless trouble for the nominal sum of Three Dollars (\$3.00) a year.

One Compound Brick will neutralize 3,000 gallons of water, all depends upon the acidity of the water. You can ascertain by the hardness of the water if the Compound Brick is consumed.

The water can be used for the same purposes it was before injector was installed.

## CAPACITIES

Number	City Pressure, Pounds	Water Lifted Per Hour, Gallons	City Water Used per Hour, Gallons	Extreme Height of Lift, Feet	Extreme Height of Lift with Suction connected to City Water, Feet
9	20 to 40	75 to 120	170 to 250	80 to 160	160 to 320
10	30 to 40	120 to 160	130 to 170	60 to 80	120 to 160
10 1/2	50	200	170	60	120
11	30 to 40	175 to 230	185 to 245	60 to 80	120 to 160
12	30 to 40	250 to 300	265 to 320	60 to 80	120 to 160
13	20 to 40	120 to 220	250 to 480	80 to 160	160 to 320

The above table is based upon a lift of 15 feet from the cistern, a lift of more or less than this height will give a corresponding decrease or increase in the volume of water discharged, the consumption of city water being in the same proportion as above.

## WEIL'S ELECTRIC HYDRAULIC WATER LIFTS

EUREKA AUTOMATIC ELECTRIC

A-1423

AUTOMATIC SWITCH  
FOR DIRECT  
PRESSURE

A-1424

AUTOMATIC SWITCH FOR  
OPEN TANK SYSTEM

A-1425

The Eureka Automatic Electric Water Lift is constructed with Double Oscillating Bronze Pumps, back geared direct to motor. The base and all supporting parts are extra heavy. Valves and connections are of bronze. This machine is especially adapted for use in supplying soft water for high class residences, etc. It can be used to pump directly into the service pipes without the use of an attic tank, also, for increasing the pressure in localities where the city pressure is not sufficient to supply the upper floors of high buildings. It is provided with Controller to automatically start and stop as water is used, and will elevate water to the height of 110 feet.

Automatic Direct Pressure Switch A-1423 is sent with each lift and is included in price named below.

## DIMENSIONS AND CAPACITIES

	Length, inches	Width, inches	Height, inches	Stroke, inches	Diameter Pistons, inches	Capacity per Hour, Gallons	Maximum Lift, Feet
No. 101.....	20	20	24	3	1 3/4	275 to 300	150

**WEIL'S HOUSE HEATING BOILERS**  
**"ANNAPOLIS" STEAM AND "WEST POINT" HOT WATER**  
**VERTICAL SECTIONAL TYPE**

View showing Fire Travel and method of connecting by Tapered Cast Iron Nipples.

**GENERAL DESCRIPTION**

"Annapolis" and "West Point" Steam and Hot Water Heaters are, in every respect, marvels of heating efficiency. Tests have shown greater efficiency for these boilers than is possessed by any other boiler with which we are familiar. This is true both as to prime and flue heating surface. We are able to claim that they will generate more steam than any boiler made to-day. They are the vertical sectional type.

The sections are assembled with heavy cast iron slip nipples, held together with wrought iron rods which pass through the cored openings in the sections, but do not come in contact with the fire or water. The cast iron slip nipples used are perfectly machined. The holes in the section are reamed with the same exactness. This insures a perfect iron to iron connection.

## WEIL'S HOUSE HEATING BOILERS

### THE "ANNAPOLIS" STEAM AND "WEST POINT" HOT WATER

#### VERTICAL SECTIONAL TYPE

##### GENERAL DESCRIPTION — Continued

Special attention has been paid to the fuel carrying capacity of the Fire Pot which is exceptionally deep. This insures a lasting and steady fire which requires but little attention.

The Ash Pit is large and of proper height to allow for the free circulation of air under the grates. The door of the pit is large enough to allow the removal of ashes without difficulty. The ash pit door is arranged with the Butterfly type of draft door. This is connected to the automatic damper regulator for steam and provided with ratchet for regulating draft on the Water Boiler.

The fire travel is upward between the overhanging heating surface of each section. This overhanging surface is provided with an opening on either side of each section. These openings are so arranged with Baffle plates as to form a flue through which the fire travels to the rear of the boiler, then traveling upwards enters the outer row of flues on each side of the boiler.

This course brings the heated gases to the front of the boiler, then back through the center rows of flues to the smoke outlet. It can be readily seen by this extensive fire travel, through which the heated gases must pass before leaving the boiler, that a very large per cent of the heat units in the fuel is absorbed by the water. This insures a very low smokestack temperature.

The grates are of the rocking and dumping variety and are adapted for burning either hard or soft coal. Grate stops are placed in front of the ash pit so that by turning from one position to another, grates may be dumped or be shaken without danger of dumping, or when grates are perfectly level be locked in that position.

The several doors on the front section are fitted to the section, doing away with loose door frames. The clean out doors are so located as to make all parts of the boiler easily cleaned. The fire door is of large area, which permits of easy firing. The clinker door at the grate line is of ample size to permit of the thorough and easy cleaning of the fire at that point.

Openings are cored in the back section to permit the insertion of a pipe coil in the fire box for heating water for domestic purposes.

The smoke hood on the back section is provided with Butterfly draft door and so arranged that the smoke pipe can be taken off the rear or top of the smoke hood.

The crown sheet and other heating surfaces of the different sections are so arranged that two-thirds of the total heating surface of the boiler is prime heating surface.

18 in. Add to length of heater for smoke hood.

ALL BOILERS WILL BE TAPPED AS ABOVE UNLESS OTHERWISE SPECIFIED

## WEIL'S HOUSE HEATING BOILERS

"YALE" STEAM

View of Sections

## GENERAL DESCRIPTION

The succesful result of an effort to produce a first-class heater at a moderate cost.

Single piece ash-pit, fire-pot, sections and dome.

All connections made by heavy cast-iron tapered nipples in center of boiler. One connection makes erection simple. Center connection means a faster steam generation and less friction in the water travel.

Grates—rocking and dumping variety. Shaking lever lock holds grates perfectly level. By throwing lock a half-turn, the fire can be dumped into the ash-pit.

The corrugated surface of the fire-pot increases the efficiency about one third.

View showing  
Interior of Fire Pot.  
Deep corrugations  
and water arms.  
A complete boiler  
in itself.

No dead fire at the outer walls.

Water arms extend to the crown-sheet supplying enough water to prevent the boiler priming.

Deep fire-pot with fire-door at the top permits carrying the fire a greater length of time. This means an economic consumption of coal. There is a large space for perfect combustion due to the distance between bottom of fire door and crown sheet.

Clean-out door in front and rear.

Boiler connected on outside by four heavy rods.

Equipment includes all necessary trimmings—automatic damper and regulator, water-gauge, gauge-cocks, safety-valve, water-column, steam-gauge, fire-tools, etc.

## WEIL'S HOUSE HEATING BOILERS

### "VASSAR" HOT WATER

View of Sections and Fire Pot

#### GENERAL DESCRIPTION

The "Vassar" is in our judgment the best Hot Water Heater manufactured.

The fire-pot is almost a heater in itself. It is extra deep, which gives of course, a large combustion chamber. The corrugated surfaces increase the heating efficiency about one-third.

The baffle plate is cast solid to the fire-pot section, and comes in direct contact with the hottest gases. The flue openings are of proper size. In addition to this, there are two or more sections placed over the fire-pot, which absorb a large per cent of the remaining gases. These sections are placed above each other, with flue openings that are staggered, so that the heated gases do not have a direct travel.

The sections are connected by means of heavy perfectly machined cast iron push nipples and are drawn together by heavy bolts on outside of Heater making it simple and easy to erect.

The door of the fire-pot is large. Each section is supplied with a clean-out door and there is a clinker door placed on a level with the grate.

The grate and ash pit represent the acme of perfection in heater manufacture. The grates are of the rocking and dumping variety, and permit the burning of hard or soft coal, or wood.

There are two outlets, one on each side of smoke pipe and the fire-pot is cored on the left hand side for coil.

Ash Pit

The ash pit is fitted with a simple lock, which prevents accidental dumping, while shaking. It is so made that the grates can be either shaken or dumped at the will of the operator. The ash pit door is large, while the ratchet feed draft door enables the operator to regulate the drafts perfectly.

## WEIL'S HOUSE HEATING BOILERS

## "PURDUE" HOT WATER

## GENERAL DESCRIPTION

The Purdue Water Heater is of the same general construction as the Yale Steam Heater, which is illustrated in the preceding pages, with exception of a narrow dome or top section, as the larger dome on the Yale is only for reserve steam space. The Purdue is a very economical heater, as the fire surfaces, in shape of extending arms and corrugated surfaces in fire pot, add greatly to make it very efficient.

The Purdue also has the single tapered cast iron nipple connection in center of the boiler.

Clean out doors are placed both in front and in rear which make every part of the boiler accessible to be thoroughly cleaned—one of the most essential points to be considered in the purchase of a heater of any kind.

Openings in Firebox for Coil, \$4.00 list per Boiler.

Boilers for 150-pound test pressure will be made with Wrought-Iron Rings, at above extra price.

The Base-Rings and Door-Rings are made of semi-steel, which is much stronger than cast iron.

A - 3 7 5 9 Box Bases are made for two, three or four column Florentine or Puritan Design Radiators. Bottom of Air Inlet is one half inch above floor. The damper arrangement operates both front and back dampers with one lever adjusting to atmospheric conditions by controlling the intake of cold air as desired.

Unless otherwise ordered, black pipe, random lengths, with threads and couplings will be shipped.

For cut lengths, an extra charge will be made above random lengths.

For pipe smoothed on the inside, known as plugged and reamed, an extra charge will be made above regular pipe.

For galvanized pipe, an extra charge will be made above black.

For asphalted pipe, an extra charge will be made above black.

NOTE: — The term "Wrought Iron Pipe" is used indiscriminately to designate all butt or lap welded wrought pipe and all inquiries and orders so designated will be understood to indicate "Merchant Pipe" which is the regular pipe of the market and made of wrought steel. If your requirements are for pipe made of "wrought iron" the term "Genuine Wrought Iron" should be used and quotations or shipments will be made accordingly.

NOTE—3/4 and 1 inch Sizes are Brass Body, larger sizes Iron Body.

A-4307 is for tank service or for controlling flow of steam, water or other fluid to pump or other device. Will operate against high or low pressure and being perfectly balanced requires only small size float. In ordering state whether wanted for steam, hot or cold water. Floats are not included in above prices.

## PRESSURE REGULATORS, ETC.

"ECLIPSE" STEAM PRESSURE  
REDUCING VALVE

A-4308

"ECLIPSE" VACUUM PRESSURE  
REGULATING VALVE

A-4309

## "ECLIPSE" STEAM PRESSURE REDUCING VALVES

Size in.	$\frac{3}{4}$	1	$1\frac{1}{4}$	$1\frac{1}{2}$	2	$2\frac{1}{2}$	3	$3\frac{1}{2}$	4	$4\frac{1}{2}$	5	6

NOTE—"Eclipse" Reducing Valves can be furnished in sizes 7 to 12 inch. Prices on application.

## "ECLIPSE" VACUUM PRESSURE REGULATING VALVES

Size - inches	1x2	$1\frac{1}{4}$ x $2\frac{1}{2}$	$1\frac{1}{2}$ x3	2x4	$2\frac{1}{2}$ x5	3x6	4x8	5x10	6x12
A-4309 .....	Each \$33.00	42.50	53.50	72.00	96.00	126.00	187.50	242.00	325.00

NOTE—A-4309 illustrates Valve with Increased Outlet but can be furnished with Inlet and Outlet same size in all sizes  $\frac{3}{4}$  to 12 inch. Prices on application.

HUGHSON" STEAM PRESSURE  
REGULATING VALVE

A-4310

"ECLIPSE" LOW PRESSURE  
REGULATING VALVE

A-4311

## "HUGHSON" STEAM PRESSURE REGULATING VALVES

Size inches	$\frac{3}{4}$	1	$1\frac{1}{4}$	$1\frac{1}{2}$	2	$2\frac{1}{2}$	3	$3\frac{1}{2}$	4	$4\frac{1}{2}$	5	6
A-4310 .... Each	\$18.00	22.00	28.00	35.00	44.00	57.00	72.00	90.00	100.00	125.00	135.00	180.00

NOTE—A-4310 is adapted for controlling steam pressure from any initial pressure up to 250 pounds to a lower pressure, not less than 15 pounds. This is an ideal valve where flow of steam is irregular. We can furnish also in sizes 7 to 12 inch. Prices on application.

## "ECLIPSE" LOW PRESSURE REGULATING VALVES

Size in.	$\frac{3}{4}$	1	$1\frac{1}{4}$	$1\frac{1}{2}$	2	$2\frac{1}{2}$	3	$3\frac{1}{2}$	4	$4\frac{1}{2}$	5	6
A-4311 .... Each	\$23.00	23.00	24.00	25.00	30.00	35.00	42.50	52.50	60.00	70.00	75.00	100.00

NOTE—A-4311 is especially adapted for Low Pressure Heating Systems. It is very sensitive and absolutely reliable. It is intended for reducing boiler pressure of not above 100 pounds to a pressure varying between one and fifteen pounds.

WATER SUPPLY SYSTEMS

UPRIGHT PRESSURE TANK AND HORIZONTAL  
HAND PUMP OUTFIT

A-4620

A-4620 illustrates our Upright Pressure Tank and Hand Pump Outfit adapted for the Water Supply of medium sized residences. It is compact, requires but little space and is a popular outfit as it has sufficient capacity for supplying water to Kitchen, Laundry and Bath Room. The Pump is especially designed for pumping both air and water but may be used to pump water only by closing valve on air compressor attachment.

This Pump will deliver water from a well or cistern located at a considerable distance, but the water should not be a greater depth from pump than 20 feet. We suggest the use of foot valve on end of suction pipe in well or cistern.

The Tank has a capacity of 315 gallons and will deliver about 225 gallons when pumped to 45 pounds pressure. A few minutes pumping each day is sufficient to furnish the average family with the ordinary water supply requirements.

THE COMPLETE OUTFIT COMPRISES THE FOLLOWING:

Pressure Tank, 6 Feet by 36 inch; Horizontal Air and Water Force Pump, Water Gauge, Pressure Gauge, 1 inch Gate Valve, 1 inch Check Valve, ¾ inch Stop and Waste, ½ inch Hose Bibb. Also necessary pipe and Fittings to make connections as shown in above illustration.

A-4620 Water Supply Outfit complete as described .....\$100.00

Larger or smaller Tanks can be furnished as well as Outfits adapted to special requirements. Prices on application.

## WATER SUPPLY SYSTEMS

GASOLINE ENGINE, HORIZONTAL POWER PUMP AND HORIZONTAL  
PRESSURE TANK OUTFIT

A-4621

A-4621 illustrates our Power Water Supply Outfit for Heavy Service with Gasoline Engine, Horizontal Power Pump with Capacity of 720 Gallons per hour and 1000 Gallon Horizontal Pressure Tank rigged complete as shown in illustration.

## THE COMPLETE OUTFIT COMPRISES THE FOLLOWING:

Double Acting Power Force Pump 3x5 inch Brass Lined Cylinder, Capacity 720 Gallons per hour.

Two Horse Power Hopper Cooled Gasoline Engine.

Horizontal Pressure Tank 14 Feet by 42 inches. Capacity 1000 Gallons, Working Capacity 665 Gallons.

Pressure Gauge, Water Gauge, 1½ inch Gate Valve, 1½ inch Check Valve, 1 inch Relief Valve, Hose Bibb and Stop Cock.

Also all necessary Pipe, Fittings, Belting and Tank Supports to erect and fit up as above illustrated.

A-4621 Water Supply Outfit complete as described .....\$300.00

NOTE—The above Outfits can be furnished with larger sizes of Pumps or with Vertical Engine or to suit special requirements. Prices on application.
